WORK EXPERIENCE

FI Barbershop | Full-Stack Engineer Intern

Feb 2026 - Present

- Developed a full-stack web application and new member loyalty ecosystem from scratch for 99 active outlets, currently in the final pre-production stage for a **May soft launch**.
 - Built an API and Supabase backend, featuring a resource-efficient automated polling system that syncs transaction data from the Moka POS.
 - Applied security measures including Google OAuth, WhatsApp OTP authentication, JWT-based sessions, and database access control (RLS & audit logs).
 - Designed the system architecture to handle dynamic scaling, ensuring automated routing and zero downtime during the addition or removal of new outlet branches.
 - Implemented RFM-based customer segmentation to support targeted voucher campaigns for loyalty members.
-

EDUCATION

Universitas Bina Nusantara - Data Science

Aug 2023 - Present

Current GPA: 3.38/4.00

PROJECT

E-Commerce App Review Analytics | Python, IndoBERT, NLP

- Analyzed 30K+ user reviews by implementing K-Means Clustering on IndoBERT embeddings to extract core operational pain points (Shipping, UX, Technical).
- Engineered temporal Topic Drift detection backed by an automated sentiment validation model to track emerging app issues.

Loan Default Risk Modeling & Segmentation | Python, ML, Power BI

- Developed an XGBoost classification model on 30K+ records to identify high-risk customers, achieving 94% accuracy and 98% precision.
 - Simulated bayesian strategies projecting a 12-21% decrease in default rates, and built an explainable Power BI dashboard utilizing SHAP values.
-

TECHNICAL SKILLS

- Languages & Databases: Python, JavaScript, HTML/CSS, PostgreSQL (Supabase).
 - Machine Learning & AI: PyTorch, Scikit-Learn, Text Mining.
 - Data Analytics & Tools: Power BI, Git/GitHub, Data Engineering (ETL Pipelines), Figma.
-

CERTIFICATIONS & LANGUAGES

- **Languages:** English (TOEFL ITP: 623/677 - Professional Working Proficiency), Mandarin Chinese (HSK 2), Indonesian (Native).
- **Certifications:** Data Classification Using IBM Granite (IBM), Deep Learning A-Z & Business Data Science (Udemy), Practical Machine Learning (Digital Talent Scholarship).
